CHS303

The medical anti-bedsores mattress consists of a number of bars or spherical chambers. Press 1,3,5... for single row, 2,4,6... It is arranged into a single double exhaust chamber in a double-row arrangement, which can change the pressure point of the body continuously, and keep the blood circulation of the patients in normal circulation. There are regular micropores in the air chamber, which can be pumped out of the micropores to keep the skin dry, thus preventing bedsores.
Air Mattress size: 1950 x 900

Main Technical Indicators

- Charge and release cycle: 5min for each aeration, 5 min for air release, 10min for one cycle, plus or minus 5% of the gas cycle
- Maximum inflatable pressure: the air charging pump can be adjusted by inflating pressure with maximum pressure greater than 12kpa: Air mattress under maximum working load, the maximum pressure is greater than 4kpa
- Maximum bearing weight: 135kg
- Gas pump: no more than 20VA
